Mini Queens

One queen in each row, column and region. No two queens attack, even on a long diagonal.

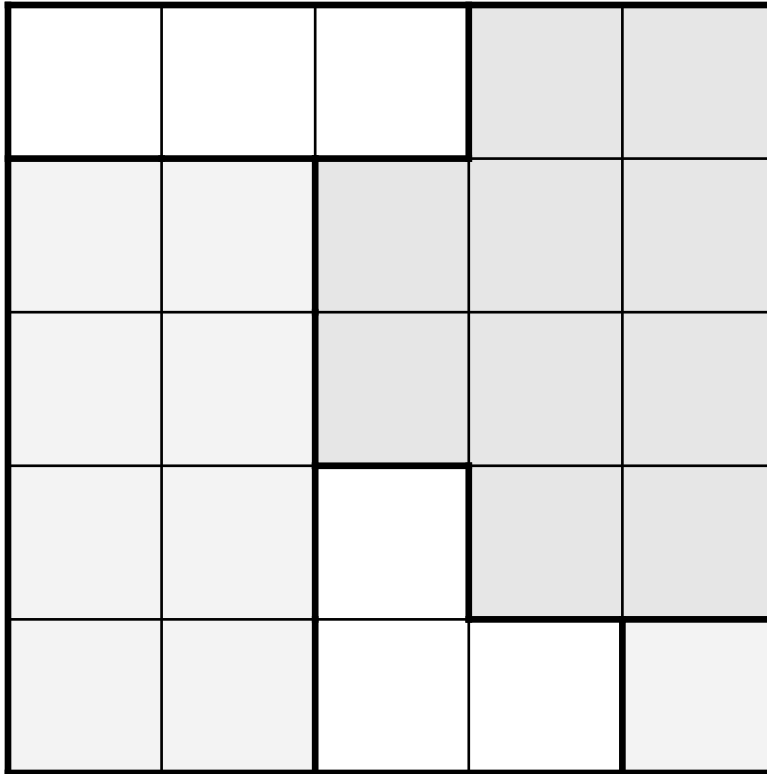

- 1 A row, column or region with one free square gets a queen.
- 2 X every square a queen attacks: row, column, region, diagonals.
- 3 Region inside one row or column? X the rest of that line.

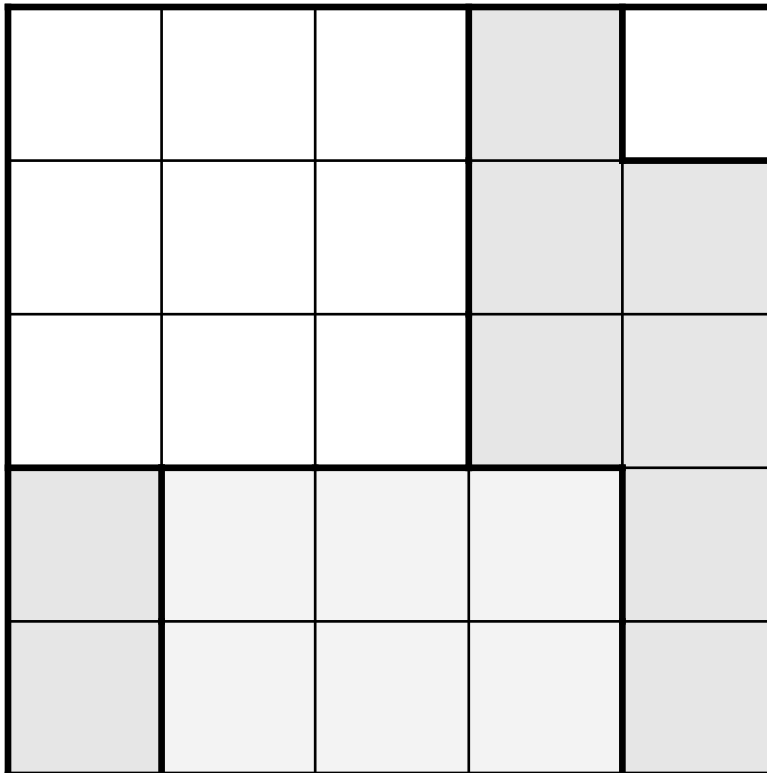

Why can't a queen go in the circled square?

**1****Mini Queens**

One queen in each row, column and region. No two queens attack, even on a long diagonal.

**2****Mini Queens**

One queen in each row, column and region. No two queens attack, even on a long diagonal.
