Sum Corners

Write 1 to 25 once. Each circle is the sum of its four squares.

Trick: Compare two circles

The 52 and the 44 share two squares. So the 52's other two make 8 more. The 44's make $3 + 14 = 17$, so the 52's make $17 + 8 = 25$. $25 - 6 = 19$.

Around the 73, three squares make 56, so the last is $73 - 56 = 17$.
