Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

- 1 The dashed tree has one free side left: its tent goes here.
- 2 The 1 above this column needs 1 tent: fill each open square.
- 3 A tent here would touch all the dashed tree's free sides: grass.

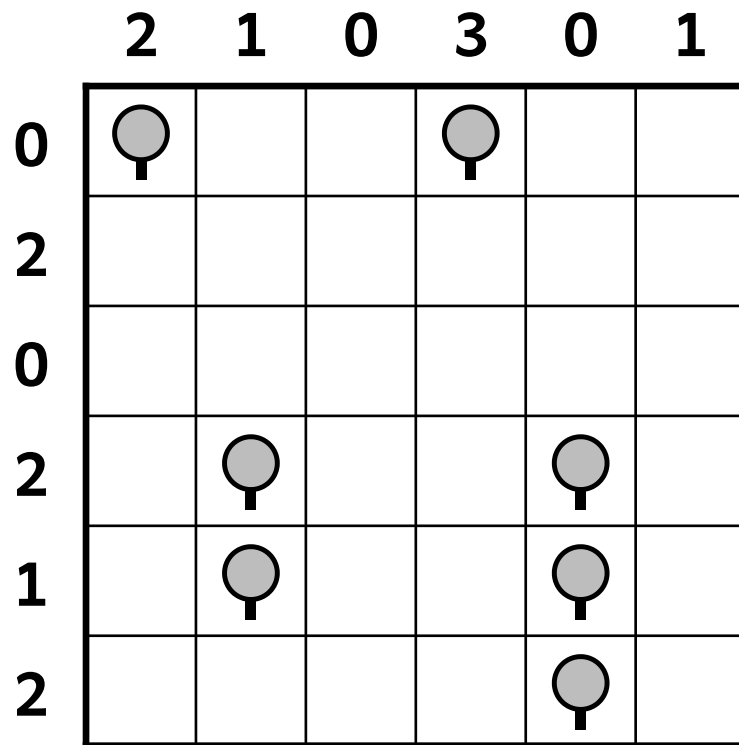

Which tree has only one place for its tent?

1

Tents & Trees

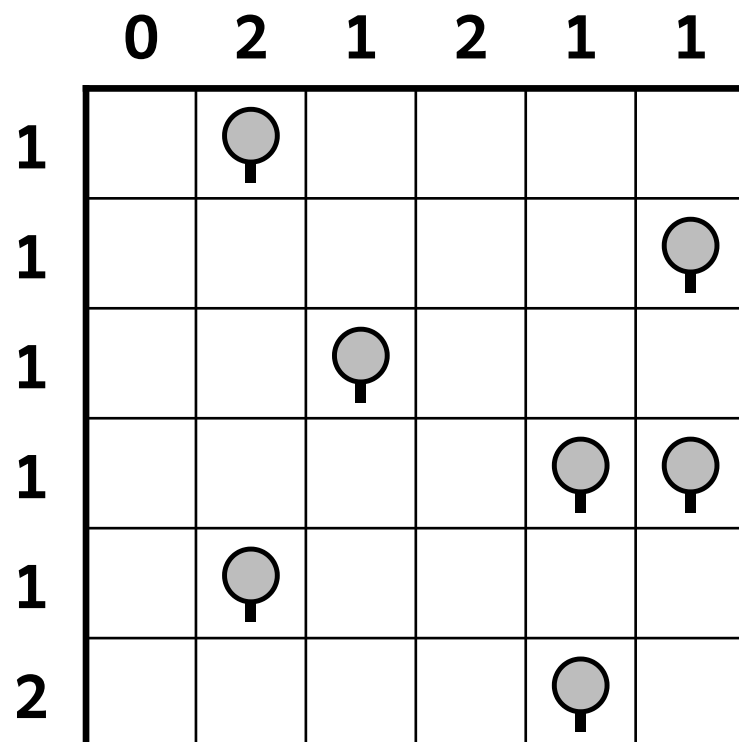

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

2

Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

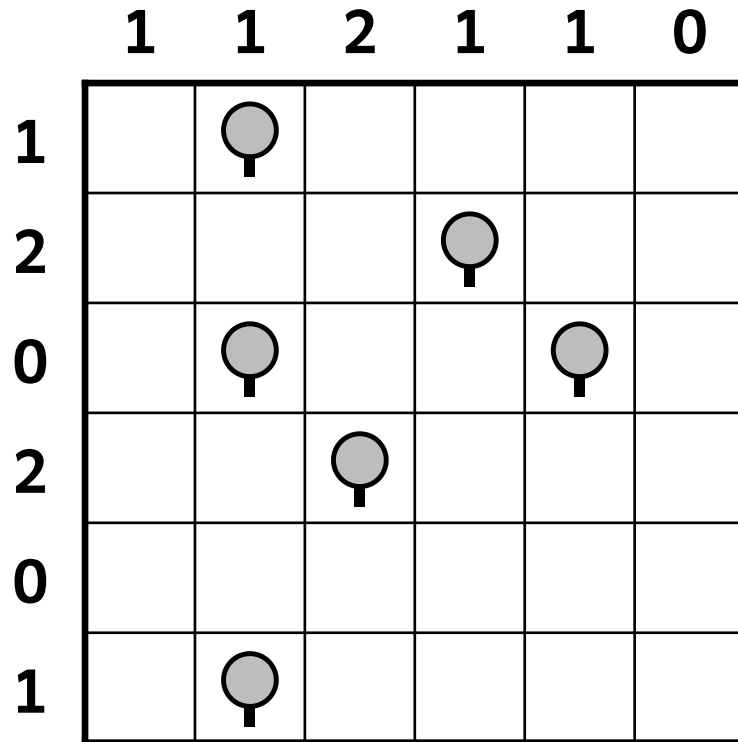

3

Tents & Trees

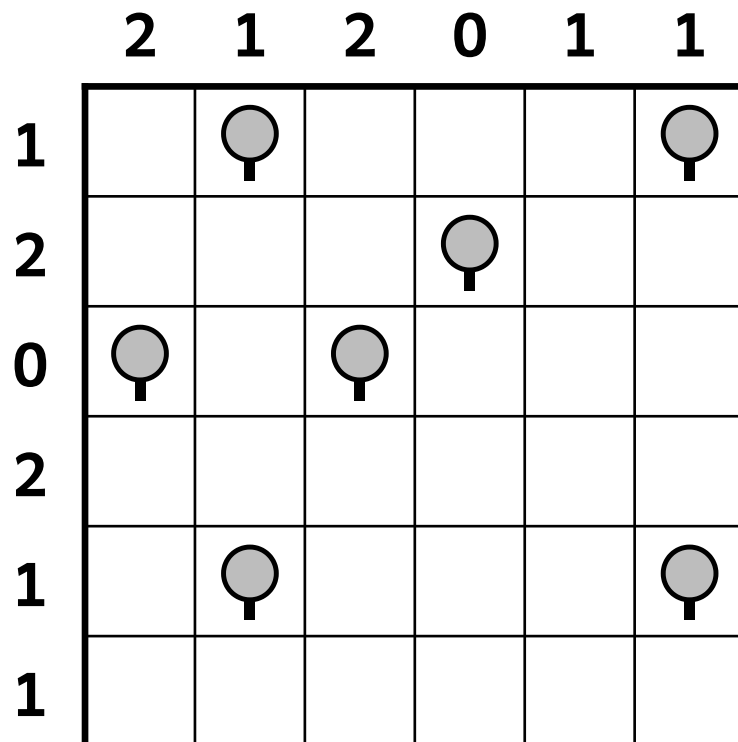

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

4

Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

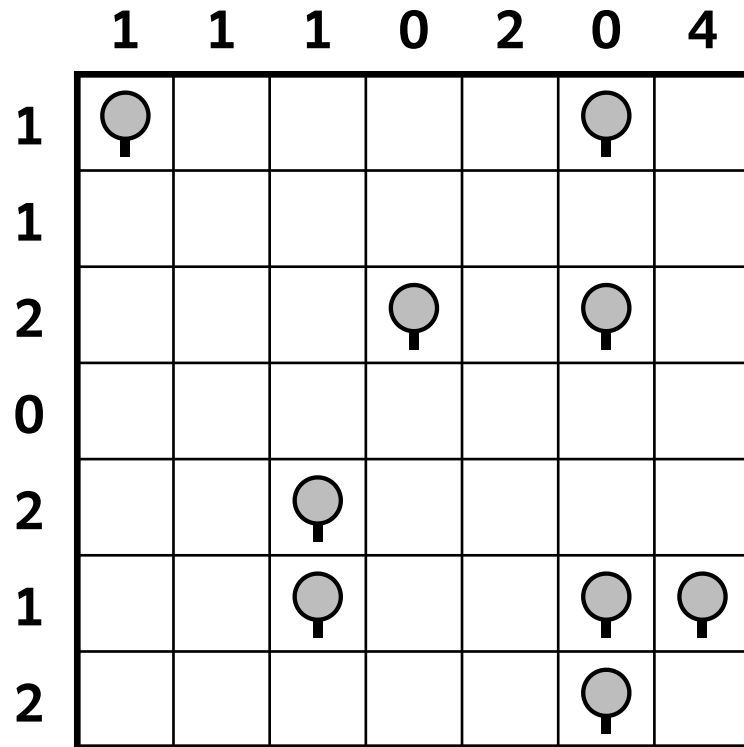

5

Tents & Trees

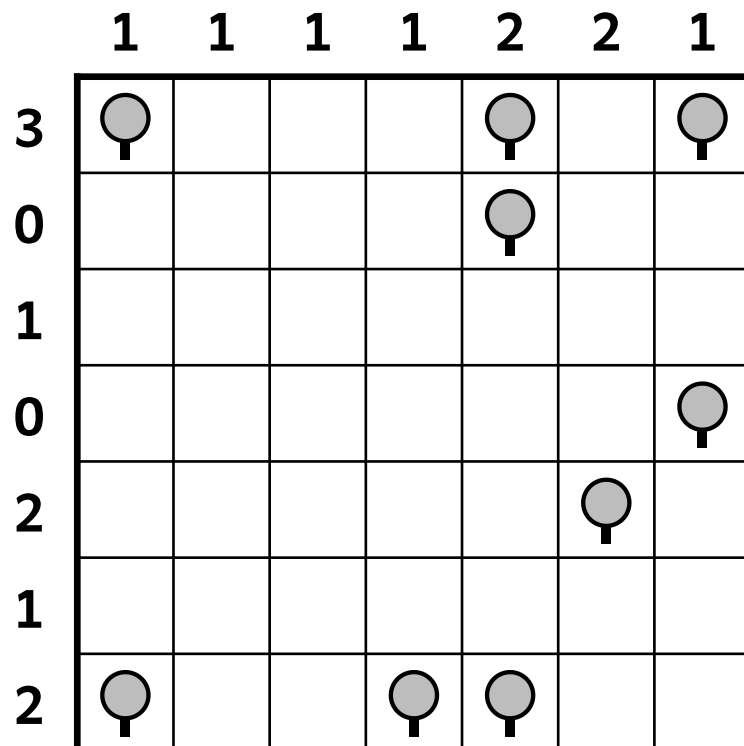

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

6

Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

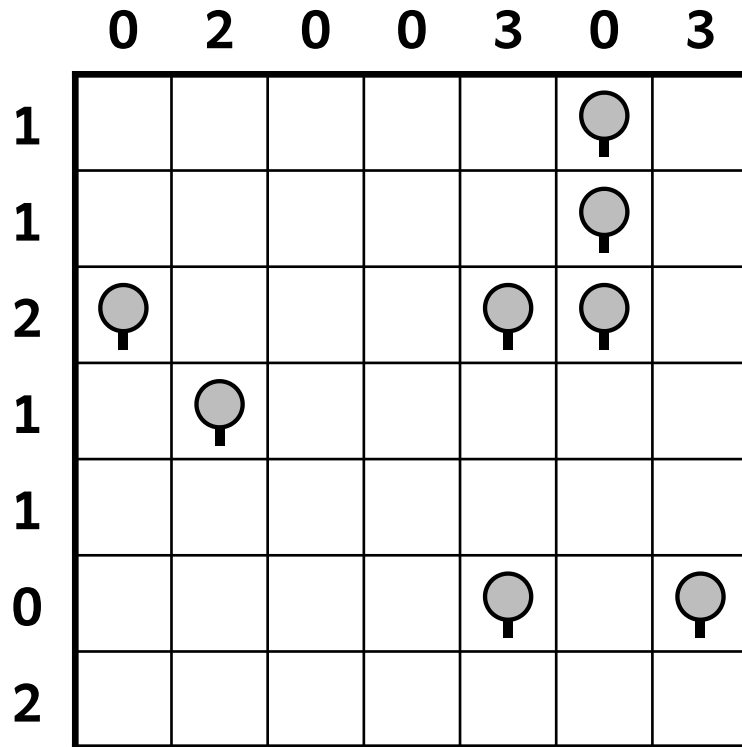

7

Tents & Trees

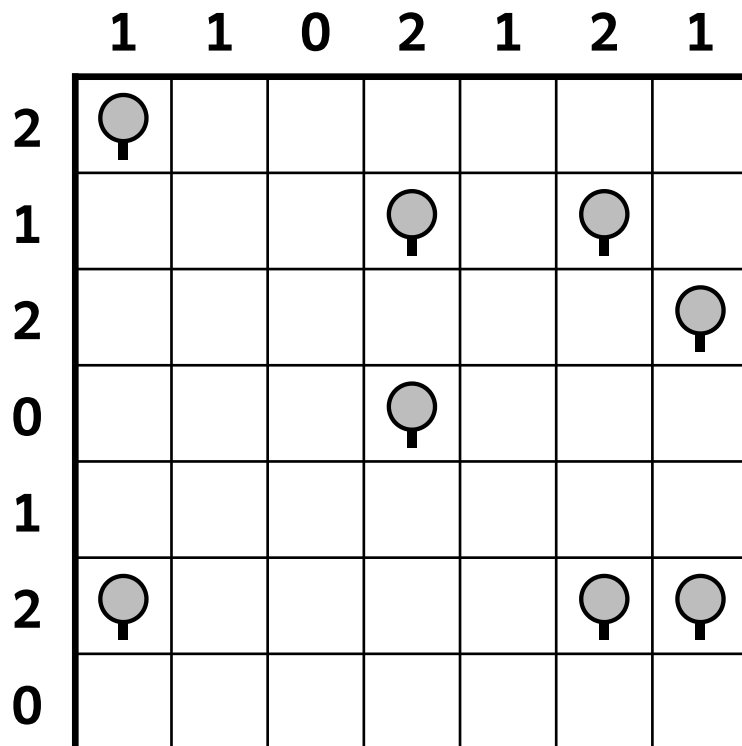

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

8

Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

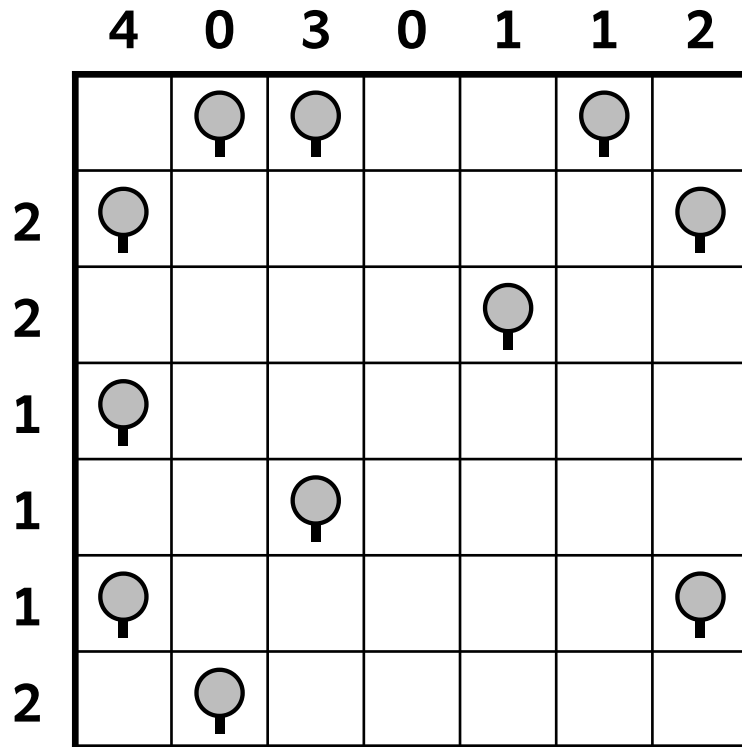

9

Tents & Trees

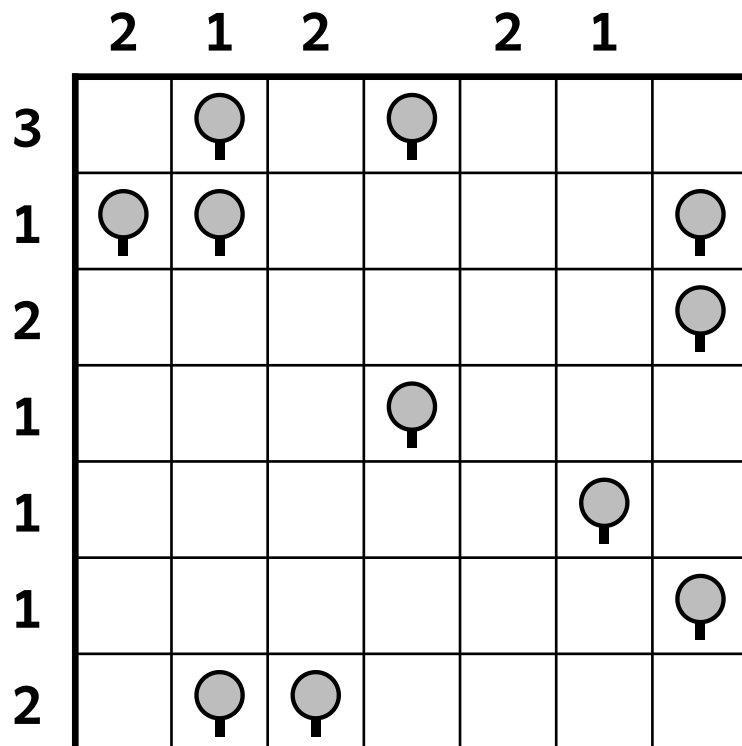

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

10

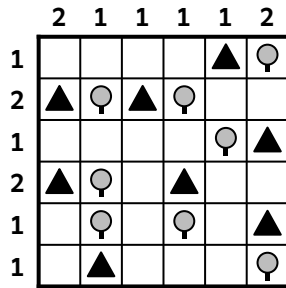

Tents & Trees

Each tree gets its own tent beside it. Tents never touch, even at corners. Numbers count tents.

#1

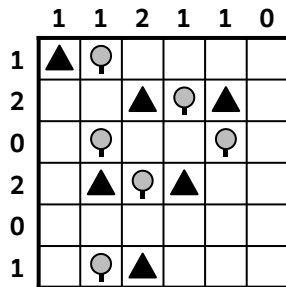

Two open squares that touch hold at most one tent. Count column 4 again: row 6, column 4 is a tent.

#2

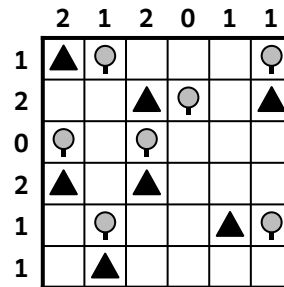

A tent at row 2, column 3 would touch every free side of the tree at row 1, column 2, so it is grass.

#3

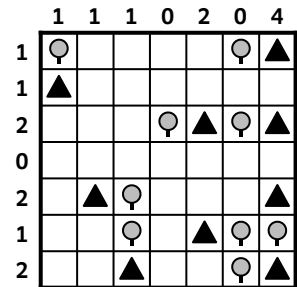

Two open squares that touch hold at most one tent. Count row 2 again: row 2, column 5 is a tent.

#4

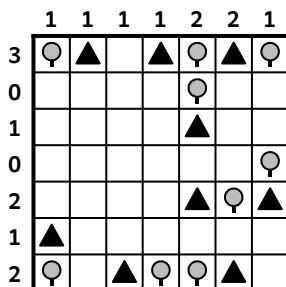

A tent at row 2, column 5 would touch every free side of the tree at row 1, column 6, so it is grass.

#5

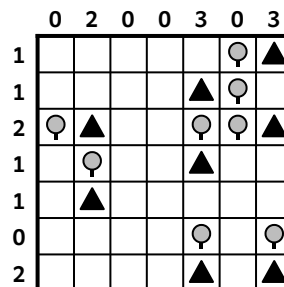

Column 1 needs a tent in every open square left, so row 2, column 1 is a tent.

#6

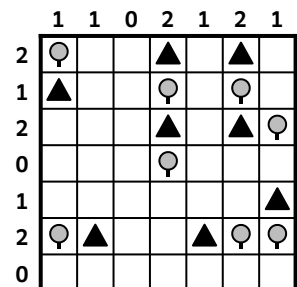

Row 1 needs a tent in every open square left, so row 1, column 4 is a tent.

#7

Column 2 needs a tent in every open square left, so row 5, column 2 is a tent.

#8

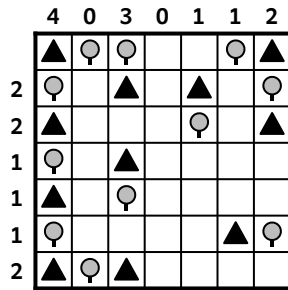

Row 3 needs a tent in every open square left, so row 3, column 6 is a tent.
